Preface

The major objective of publishing this Bulletin is to provide the public at large with the relevant information and data regarding external and domestic debt position of the country. However, it does not encompass any analysis, as the aim is to give the user the liberty of using the data when carrying out its own research.

The Bulletin is structured as follows: Part I covers general information and accounting principles including the coverage, methodology, classification, source, revision policy, fiscal year and frequency and time lag of publishing the Bulletin. Part II and Part III contain statistical tables and figures, respectively. Finally, Part IV gives the standard definitions of some concepts and terminologies used in public debt management, which is believed to give the reader a better understanding and avoid misapprehension of the figures.

Acronyms & Abbreviations

CREDITORS

AfDB	African Development Bank
AfDF	African Development Fund
AFD	Agence Francaise de Development
BADEA	Arab Bank for Economic Development in Africa
CDB	China Development Bank
CBB	Construction and Business Bank
CBE	Commercial Bank of Ethiopia
DBE	Development Bank of Ethiopia
EEC	European Economic Commission
EIB	European Investment Bank
ICBC	Industrial and Construction Bank of China
IDA	International Development Association
IFAD	International Fund for Agricultural Development
IMF	International Monetary Fund
NBE	National Bank of Ethiopia
NDF	Nordic Development Fund
OFID	OPEC Fund for International Development
PSSSA	Public Servants Social Security Agency
POESSA	Private Organizations Employees' Social Security Agency
SFD	Saudi Fund for Development

OTHERS

CF	Common Framework
DMD	Debt Management Directorate
DSSI	Debt Service Suspension Initiative
EAL	Ethiopian Airlines
EEP	Ethiopian Electric Power
EEU	Ethiopian Electric Utility
ERC	Ethiopian Railway Corporation
ESC	Ethiopian Sugar Corporation
ESL	Ethiopian Shipping Lines
FY	Fiscal Year
HIPC	Heavily Indebted Poor Countries
LAMC	Liability Asset Management Corporation
MDRI	Multilateral Debt Relief Initiative
MoF	Ministry of Finance
NPC	Non- Paris Club
PC	Paris Club
SOEs	State Owned Enterprises

CURRENCIES

JPY	Japanese Yen
KWD	Kuwait Dinar
KRW	Korean Won
SAR	Saudi Arabia Riyal
SDR	Special Drawing Rights
USD	United States Dollar

PART I

GENERAL INFORMATION & ACCOUNTING PRINCIPLES

PART I

GENERAL INFORMATION & ACCOUNTING PRINCIPLES

1. COVERAGE

‘Public Sector Debt Statistical Bulletin’ provides information on the public debt including:

- (i) *the central government external debt,*
- (ii) *the government-guaranteed external debt,*
- (iii) *the non-guaranteed external debt,*
- (iv) *the central government domestic debt, and*
- (v) *the government-guaranteed domestic debt.*

The central government external debt refers to all external loans contracted between external creditors and MoF; while the government-guaranteed external debt comprises of loans and suppliers credits contracted by public enterprises, mainly the Ethiopian Electric Power (EEP), Ethiopian Electric Utility (EEU), Ethiopian Sugar Corporation (ESC), Ethiopian Railways Corporation (ERC), Ethiopian Shipping Lines (ESL) and guaranteed by MoF as well as the state owned bank- the Commercial Bank of Ethiopia (CBE). The non-guaranteed external debt, on the other hand, includes loans contracted by public enterprises, mainly the Ethiopian Airlines (EAL) and Ethio-Telecom (former ETC), without government or government owned bank guarantee. Domestic debt covers the debt of the central government in forms of government bonds, treasury bills, direct advance from the central bank, Corporate Bonds, long and Short term loans owed by SOEs . In future editions consideration will be given to extending the coverage to on-lent loans, as well as major debt sustainability indicators of the country.

2. METHODOLOGY

2.1 Database: The Debt Management Directorate (DMD) of MoF uses Debt Management and Financial Analysis System (DMFAS) of UNCTAD to record detail loan information and produce aggregated data and reports for the public sector debt.

2.2 Converting Debt Data to a Common Currency: To produce summary tables, the debt data has to be converted into a common currency, usually the US dollar or ETB, as follows:

- Stock figures: to convert stock figures into US dollars or ETB, end period exchange rate is used.
- Flow figures: to convert flow figures into US dollars or ETB, exchange rate as day of transaction is used.

2.3 Treatment of Arrears (Debt under negotiations for Debt Relief Comparable to HIPC Terms) : As the bilateral debt reorganization negotiations with some of the non-Paris Club and commercial creditors have not yet been finalized, the government

has been accumulating principal and interest arrears and the amount is included in the total outstanding debt.

2.4 Treatment of Debt Reorganization: Ethiopia has benefited from Paris Club debt reorganizations, HIPC Initiative, MDRI as well as bilateral debt reduction agreements with non-Paris Club and commercial creditors. Specially, in relation with the implementation of the HIPC Initiative and usage of the HIPC funds, a special bank account has been opened at the National Bank of Ethiopia, where the savings from the debt service due could be deposited until it is channeled to the central treasury account.

3. CLASSIFICATIONS

The classification of the debt data used in this bulletin mostly complies with the international standards indicated in the ‘External Debt Statistics: Guide for Compilers and Users’, with some customization to own use.

4. SOURCES

4.1 Debt Data: The primary source of information for the debt statistics is the debt database administered by the Debt Management Directorate (DMD) of the Ministry of Finance using Debt Management and Financial Analysis System (DMFAS) of UNCTAD.

4.2 Exchange Rate: The exchange rates used for compiling debt data are obtained from the National Bank of Ethiopia (Daily Transaction Exchange Rates).

5. REVISION METHOD

Debt data indicated in the very last period of the observation period usually are subject to changes and, therefore, are labeled as ‘P’ to indicate that they are provisional. Disbursement documents are sometimes received after two to three months lag and the database has to be updated when documents are received. This leads to changes in figures for disbursements and outstanding debts; and subsequent editions would come up with revised figures, labeled as ‘R’.

6. FISCAL YEAR

Even though the Ethiopian fiscal year runs from July 8 to next July 7, the fiscal year covered in the Bulletin is from July 1 to June 30. This is mainly because the reports submitted to various international organization covers this period and it is necessary that the figures tally with standard publications.

7. FREQUENCY & TIME LAG

This Statistical Bulletin is published quarterly with a time lag of one quarter.

Key highlights:

General

- The Government has been taking various initiatives towards boosting productive investments to enhance competitiveness and diversification and therefore strengthen the country's overall external position.
- State Owned Enterprise (SOE) reforms are underway, and progress has been recorded. These cover processes, customs, policies, laws and institutions that would govern the way such organizations and corporations would act, administer and control their operations, including corporate and finance governance.
- To assist the HGER Program the IMF board approved a three-year arrangement for Ethiopia under the Extended Credit Facility (ECF) and the Extended Fund Facility (EFF) in December 2019
- With the ECF expiring in September 2021 and the EFF expired in December 2022. The two Facilities only disbursed USD 309 million.
- In February 2021, the Liability Asset Management Corporation (LAMC) was established under the minister of council's regulation.

The Corporation's primary focus will be on absorbing and administering the debts of State-Owned Enterprises, managing assets and liabilities, and managing the investment operations of the companies in its portfolio.

- The Proclamation for the Establishment of Capital Market was approved by the House of People's Representatives (HPR) in June 2021 to support the development of the national economy by mobilizing capital, promoting financial innovation, and sharing investment risks as an alternative means of saving, reducing reliance on external sources of financing.

Total Public Sector Debt

- Total public sector debt (domestic plus external) increased by 9.8 percent to USD 62,996.50 million on June 30, 2023, up from USD 57,385.45 million on June 30, 2022. (See Table 25.)
- As of June 30, 2023, nominal public sector debt (domestic and external) was about 40.8 percent of GDP, with nominal external debt accounting for nearly 18.2 percent of that percentage. The present value of entire public sector debt as a proportion of GDP was approximately 35.4 percent, while external debt as a percentage of GDP was approximately 13 percent. (The estimated nominal GDP for June 2023 increased by 36.7 percent as compared to June 2022.) Both figures are substantially below the low-income country debt sustainability requirements of 40 percent for external debt and 55 percent for total public sector debt for nations with medium debt carrying capacity. (See also Table 26.) The issue with export-related thresholds remains.
- Domestic debt account for the majority (55.4 percent) of total public sector debt by the end of June 30, 2023, with external debt accounting for around 44.6 percent.

The Central Government is responsible for most of the public sector's total outstanding debt (domestic and External), accounting for USD 40,213.89 million (64 percent), with SOEs owing USD 22,782.61 million (36%). (See Table 25.)

External Debt

- The total external debt of the public sector as of June 30, 2023, was USD 28, 099.49 million, up from USD 27, 957.36 million as of June 30, 2022. The aggregate public sector external debt rises by a minor amount between the two periods. One explanation for this minor increase is the variation in the value of the US dollar in reference to other currencies. Another element contributing to the limited rise is lesser disbursement during the period. It was also discovered that there was a smaller Principal payment over the period. *(See tables 5,6 & 20)*
- As of June 30, 2023, the central government owed 69.6 percent of the country's external debt, while government-guaranteed and non-guaranteed SOEs owed 20.8 and 9.6 percent, respectively. *(See Table 2)*
- As of June 30, 2023, the total new loan amount signed was around USD 1,307.18 million, with borrowing by the central government accounting for roughly 60 percent and borrowing by EAL accounting for the other 40 percent. These new loans have an average grant element of 35.18 percent. *(See Tables 12 and 13).*
- From July 1, 2022 to June 30, 2023, external public sector debt disbursements totalled USD 1,468.53 million, with IDA accounting for the lion's share of this amount. This money was largely used for programmes run by the federal government. In the last three years, less external finance has been disbursed than in the prior two years. One factor contributing to the decrease in total external debt disbursement is that, with the exception of EAL, SOEs have not obtained a new loan in the last four years, and they are disbursing less and less for their older projects as they near completion and the amount of money disbursed to them decreases.
(See Tables 14 and 16)

- The principal, interest, and fees associated with repaying the External public sector debt were paid in the amount of USD 1,774.26 million between July 1, 2022, and June 30, 2023. (Principal: USD 1,354.83 million, interest and fees: USD 419.43 million). The central government pays USD 656.29 million of total external debt service (USD 428.51 million principal and USD 227.78 million interest), while SOEs pay USD 1,117.97 million. (*Refer to Table 18.*)
- The total amount of principal payments made to creditors of external sources (outflow) was less than the total amount of disbursement from creditors of external sources (inflow), as evidenced by the net external debt resource flows (Disbursement-Principal payments) of USD 125.90 million from July 1, 2022 to June 30, 2023. Furthermore, subtracting the disbursement (inflow) from principal and interest payments resulted in a net resource transfer of USD -293.52 million. The net resource transfer is negative because the entire debt service payment (P+I) is greater than the disbursement for the period. (*see table 20*).
- Since Ethiopia is a G20 DSSI eligible country that has signed a Memorandum of Understanding with the Paris Club Secretariat on DSSI related to Paris Club Countries and Non-Paris Club Countries, was not required to make any external debt service payments to its bilateral creditors of central governments in accordance with the G20 DSSI during the period (May 1, 2020 - June 30, 2021). It has suspended the central government's external debt service obligations to its bilateral creditors, which amount USD 216.0 million, as a DSSI-eligible country. Ethiopia is additionally qualified for grant aid from the IMF's Catastrophe Containment and Relief Trust (CCRT). The relief provided by the CCRT relates to about \$12,000,000 in IMF debt service that was due by October 13, 2020.

- A discussion with various development partners is underway in response to the November 2020 G20 communique on the Common Framework (CF).
- The creditor committee for Ethiopia's CF application was established, but it has not moved forward as expected, so the country has not benefited from this initiative, which could potentially raise the country's debt distress rating to Moderate risk from High risk.

Domestic Debt

- The total domestic debt as of June 30, 2023 was ETB 1,905,177.99 million, a 25.0 percent rise from ETB 1,530,078.25 million as of June 30, 2022. The total domestic debt in USD increased as well, rising from 29,428.09 million to 34,897.01 million. SOEs hold 41% of total domestic public debt, with the central government holding the remaining 59%. (*Refer to Table 21*).
- The total outstanding TBills increased by 8% to ETB 341,869.53 million on June 30, 2023, up from ETB 317 669 59 on June 30, 2022. Throughout the period, there was a net increase of roughly ETB 24,199.94 million on TBills of various maturities. (*See Table 21.*)
- The average yield for Treasury bills of 28 Days, 91 Days, 182 Days and 364 Days is increased compared last year same period.
- A new domestic debt instrument has been launched in accordance with Directive No. MFDA/TRBO/001/2022, which compels all commercial banks to purchase a five-year treasury bond at 20% of their new loan disbursement. And the stock of this new instrument was around ETB 38,263.20 Million as of June 2023.
- The total outstanding of Direct Advance, which was ETB 236,500 million as of October 7, 2022, was converted into long term bond

and a new DA was issued, totalling ETB 120,000 million. (*See Table 21.*)

- A portion out of the total domestic outstanding debt of those SOE's as of December 31,2020 transferred to LAMC, the amount transferred from those SOE's to LAMC amounted to ETB 398,694.87 million but currently the stock (principal plus interest Arrears) owed by LAMC is about ETB 540,183.03 million.

PART IV

DEFINITIONS

DEFINITIONS

It is hoped that the following definitions could help the reader to understand the concepts and correctly interpret the figures provided in the various tables. The definitions are taken from:

- ‘External Debt Management: An Introduction’, by Thomas M. Klein, World Bank Technical Paper No. 245
- ‘External Debt Statistics: Guide for Compilers and Users, BIS, ComSec, Eurostat, IMF, OECD, Paris Club Secretariat, UNCTAD, World Bank, 2003’.
- Debt and DMFAS Glossary, UNCTAD, 2008

A

Allocation of a Tranche: All or part of a loan/grant tranche assigned to finance projects or programmes.

Amortization: The repayment of principal of a loan spread out over a period.

Amortization Schedule: The schedule for the repayment of principal and payment of interest on an ongoing basis.

Arrears: The total of scheduled debt service payments that have fallen due but remain unpaid.

Average time to maturity (ATM): An indicator that measures the weighted average time to maturity of all the principal payments in the debt portfolio.

Average time to Re-fixing (ATR): An indicator that measures the weighted average time until all principal payments in the debt portfolio becomes subject to a new interest rate.

B

Bilateral Creditor: In DMFAS, it refers to a type of creditor in the context of external debt. Official bilateral creditors include governments and their agencies (including Central Bank), autonomous public bodies or official export credit agencies.

Bilateral Debt: Loans extended by a bilateral creditor.

Borrower (debtor): The organization or the entity defined as such in the loan contract which usually is responsible for servicing the debt.

C

Cancellation: An agreed reduction in the undisbursed balance of a loan commitment.

Commercial Credit: In the context of the Paris Club, loans originally extended on terms that do not qualify as official development assistance (ODA) credits.

Commercial Interest Reference Rates (CIRR): A set of currency-specific interest rates for major OECD countries.

Commitment: An obligation to furnish resource of a given amount under specified financial terms and conditions.

Commitment Charge (fee): Charge or fee made for holding available the undisbursed balance of a loan commitment.

Commitment Date: The date on which the commitment occurs.

“Common Framework (CF) for Debt Treatments beyond the Debt Service Suspension Initiative (DSSI)”. The framework aims to address the problem of unsustainable debts faced by many countries in the aftermath of the Covid-19 pandemic. The agreement includes all members of the G20 and the Paris Club.

Concessional Loans: Loans that are extended on terms substantially more generous than market loans.

Concessionality Level: See *grant element*.

Credit: An amount for which there is a specific obligation of repayment.

Creditor: The organization or entity that provides money or resources and to whom payment is owed under the terms of a loan agreement.

Creditor Country: The country in which the creditor resides.

Currency of denomination or Currency of a Loan: The unit of account in which amounts of

indebtedness are expressed in the general/loan agreement.

Currency of Repayment: The unit of account in which a loan is to be repaid.

Currency of Reporting: The unit of account in which amounts are reported to the compiling agency and/or to an international agency compiling debt statistics.

Currency of Transaction: The medium of exchange in which an individual transfer occurs.

Current Maturities: Maturities falling due during the consolidation period of a rescheduling.

D

Debt Relief: Any form of debt reorganization that relieves the overall burden of debt.

Debt Reorganization/Restructuring: Debt reorganization arises from bilateral arrangements involving both the creditor and the debtor that alters the terms established for the servicing of a debt.

Debt Rescheduling: Debt rescheduling refers to the formal deferment of debt service payments and the application of new and extended maturities to the deferred amount.

Debt Service: Refers to payments in respect of both principal and interest.

Debt-Service to Export Ratio: The ratio of debt service (interest and principal payments due) during a year, expressed as percentage of exports (typically of goods and services) for that year.

Debt Sustainability Analysis: A study of a country's medium- to long term debt situation.

Debtor Country: The country in which the debtor resides.

Direct Advance: Government overdraft from the Central Bank.

Disbursed Loans: The amount that has been disbursed from a loan but has not yet been repaid or forgiven.

Disbursed and Outstanding Debt (DOD): The amount that has been disbursed from a loan commitment but has not yet been repaid or forgiven.

Disbursement: The transactions of providing financial resources.

Domestic Currency: It is a legal tender in the economy and issued by the monetary authority for that economy, or for the common currency area to which the economy belongs.

Domestic Debt: Gross domestic debt, at any given time, is the outstanding contractual, and not contingent, liabilities that residents of a country owe to other residents of the country that require payment(s) of *interest* and/or *principal* by the debtor at some point(s) in the future.

Debt Service Suspension Initiative (DSSI): IMF, World Bank and G20 initiative to help countries to concentrate their resource to fight COVID-19 pandemic and safeguarding the lives and the livelihood of vulnerable People. In all, 73 countries are eligible for the temporary suspension of debt service

payments owed to their official bilateral creditors. The G20 has also called on private creditors to participate in the initiative on comparable terms. The suspension period, originally set to end on December 31, 2020, has been extended through June 2021.

E

External Debt: Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of *interest* and/or *principal* by the debtor at some point(s) in the future and that are owed to nonresidents by residents of an economy.

Euro Inter Bank Offered Rate (EURIBOR): is the rate at which euro interbank term deposits are being offered by one prime bank to another within the European Monetary Union (EMU) zone. Such as Euribor 6 months

F

Face Value: The amount of principal to be repaid (for example, the redemption amount of a bond).

Fixed Interest Rate: A rate of interest that is defined in absolute terms at the time of the loan agreement.

Foreign Currency: A currency other than the domestic currency.

G

Government Bonds: Negotiable securities issued by the government.

They are long term obligations issued with maturity of more than 5 years.

Grace Period: The period between the commitment date of the loan and the date of the first principal repayment.

Grant Element: The measure of concessionality of a loan, calculated as the difference between the face value of the loan and the sum of the discounted future *debt service* payments to be made by the borrower expressed as percentage of the face value of the loan.

Guarantee of a loan: An undertaking usually by a bank or a government agency to pay part or all of the amount due on a debt instrument extended by a *lender* in the event of nonpayment by the borrower.

H

Heavily Indebted Poor Countries (HIPC): Group of 41 developing countries classified as being heavily indebted poor countries.

HIPC Initiative: Framework for action to resolve the external debt problems of the heavily indebted poor countries that was developed jointly by the IMF and the World Bank and was adopted in 1996.

I

Interest Payments: Payments made in accordance with the contractual terms of a *loan* that specify the rate of interest that are to be applied, and the way in which the interest is to be computed. The *loan* may have *fixed* or *variable interest rates*.

International Development Association (IDA): IDA, established in 1960, is the concessional lending arm of the World Bank Group.

International Monetary Fund (IMF): Following the Bretton Woods Accords and established in 1945, the IMF is a cooperative intergovernmental monetary and financial institution with 184 member countries.

L

Late Interest Charges: This is the additional interest that may be levied on obligations overdue beyond a specified time.

Line of Credit: An agreement that creates a facility under which one unit can borrow credit from another up to a specified ceiling usually over a specified period.

Loan: An agreement in which a lender undertakes to make specified resources available to a borrower. The amount of funds disbursed is to be repaid (with or without interest and late fees) in accordance with the terms of a promissory note or repayment schedule.

Loan Agreement: The legal evidence and terms of a loan.

Loan Guarantee: A legally binding agreement under which the guarantor agrees to pay any or all the amount due on a loan instrument in the event of nonpayment by the borrower.

London Interbank Offered Rate (LIBOR): The London Interbank Offered Rate for deposits, such as the six-month dollar LIBOR. LIBOR is a reference rate for the international

banking markets and is commonly the basis on which lending margins are fixed.

Long-term External Debt: External debt that has a maturity of more than one year.

M

Maturity: The debt service amounts to be paid on a particular date.

Maturity Date (Final): The date on which a debt obligation is contracted to be extinguished.

Maturity Structure: A time profile of the maturities of claims or liabilities.

Medium-Term Debt Management Strategy (MTDS): is a plan that the Government intends to implement over the medium term in order to achieve a desired composition of the Government debt portfolio, which captures the Government's preferences with regard to the cost-risk trade off.

Multilateral Creditors: These creditors are multilateral institutions such as the IMF and the World Bank, as well as other multilateral development banks.

Multilateral Development Banks (MDBs): Another term for international financial institutions, such as the World Bank Group and the regional development banks.

N

Net Flows: From the viewpoint of a loan, the net flow is gross disbursements less principal repayments.

Net Present Value (NPV) of Debt: The nominal amount outstanding minus the sum of all future debt service obligations (interest and principal) on existing debt discounted at an interest rate different from the contracted rate.

Net Resource Transfers: Loan disbursements minus repayments of principal minus service payments during some period.

Nominal Value: The nominal value of a loan instrument is the amount that at any moment in time the debtor owes to the creditor at that moment.

O

Official Creditors: Official creditors are international organizations, governments and government agencies including official monetary institutions.

Official Development Assistance (ODA): Flows of official financing administered with the promotion of the economic development and welfare of developing countries as the main objective, and which are concessional in character with a grant element of at least 25 percent (using a fixed 10 percent rate of discount).

Official Development Assistance Loans: Loans with a maturity of over one year meeting criteria set out in the definition of ODA, provided by governments or official agencies and for which repayment is required in convertible currencies or in kind.

P

Paris Club: An informal group of creditor governments that has met regularly in Paris since 1956 to reschedule bilateral debts; the French treasury provides the secretariat.

Present Value: The discounted sum of all future debt service at a given rate of interest.

Present Value of Debt-to Exports Ratio (PV/X): Present value (PV) of debt as a percentage of exports (usually of goods and services) (X).

Principal: The provision of economic value by the creditor, or the creation of debt liabilities through other means, establishes a principal liability for the debtor, which, until extinguished, may change in value over time.

Principal Outstanding: The amount of principal disbursed and not repaid.

Principal Repayment Schedule: The repayment schedule of principal by due date and installment amount.

Principal Repayments: The payments which are made against the *drawn* and outstanding amount of the loan.

Private Creditors: Creditors that are neither government nor public sector agencies. These include private bondholders, private banks, other private financial institutions, and manufacturers exporters, and other suppliers of goods that have a financial claim.

Programme Allocation: A type of direct allocation for which there is a programme to account for it.

Project: A specific set of activities aimed at the development of an economic sector.

Project Allocation: Allocation of a certain amount of a loan which is going to a specific project.

Public Debt: The debt obligation of the public sector.

Public External Debt: The external debt obligation of the public sector.

Publicly Guaranteed Debt: The external obligation of a private debtor that is guaranteed for repayment by a public entity.

Public Sector: The public sector includes the general government, monetary authorities, and those entities in the banking and other sectors that are public corporations.

R

Repayment Period: The period during which the debt obligation is to be repaid.

Rescheduling: See *Debt Rescheduling*

Rescheduling Agreement: An agreement between a creditor, or a group of creditors, and a debtor to reschedule debt.

S

Service Charges: All charges that must be paid as a price for the loan, such as: interest, commitment fees, management fees.

Service Payments: Amounts remitted by the borrower to repay a debt.

Short-term Debt: Debt that has maturity of one year or less.

Spread (Margin): A percentage to be added to some defined base interest rate, such as LIBOR, to determine the rate of interest to be used for a loan.

Stock of Debt: The amount outstanding as of a moment of time.

Supplier Credit: A loan extended by an exporter to finance the purchase of that exporter's goods or contractual services.

T

Tranche: A particular portion of a financial claim or liability with its own specific terms as opposed to the general terms governing the whole claim or liability.

Treasury Bills: Negotiable securities issued by the government. In general, these are short term obligations issued with maturity of one year or less. They are traded on a discount bases.

U

Undisbursed Balance: Funds committed by the creditor but not yet utilized by the borrower.

W

Write-off: A financial claim that a creditor regards as unrecoverable and so no longer carries on its books.
